

Aoxio update instructions for v 1.7

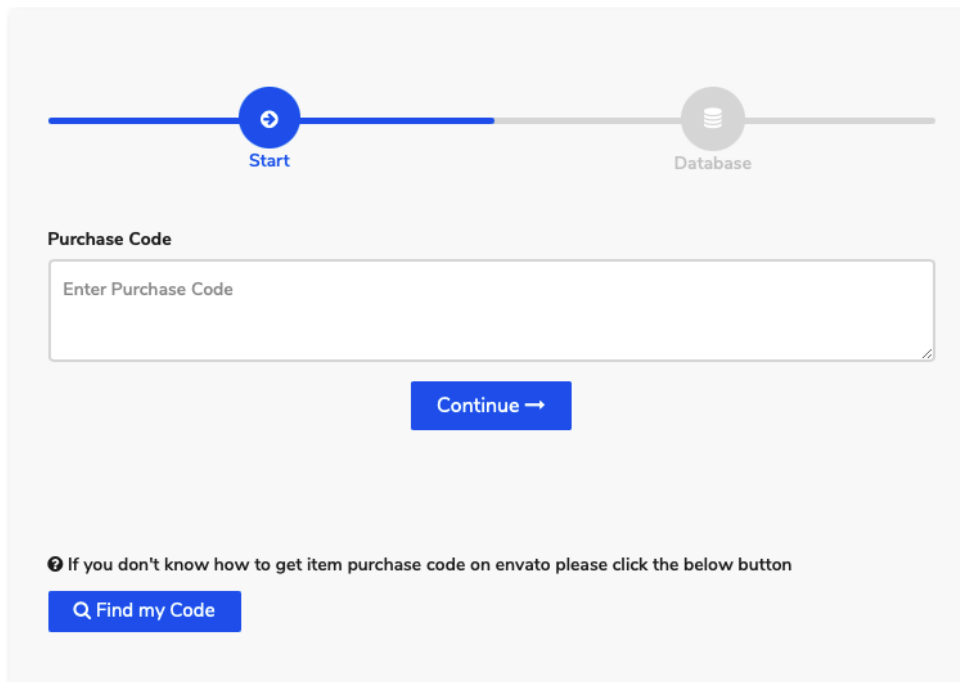

Important Before applying the update **v 1.7** make sure you are using **v 1.6** (You can check the current version to login your admin panel > footer), If you are using an older version please contact our support to get the previous versions.

Step 1: Download the latest script file and extract it on your pc. Open **updates > v1.7 > uploads** folder there you will see **2 zip files** in this folder and you need to upload those files in your server please follow the below directions carefully.

- **application.zip** > upload path: Goto your project **root folder > application** upload this zip file and extract it inside this folder.
- **assets.zip** > upload path: Goto your project **root folder** upload this zip file and extract it

Step 2: Open latest downloaded script and upload “**updates**” folder on your project root folder

Step 3: Open a browser and write a url like this: **www.yourdomain.com/updates/ v1.7** you will see a page like below here enter your item purchase code for update this script.

The screenshot displays a web interface for updating the Aoxio script. At the top, a horizontal progress bar features two circular icons: a blue one labeled 'Start' and a grey one labeled 'Database'. Below this, the section is titled 'Purchase Code'. It contains a text input field with the placeholder text 'Enter Purchase Code'. A blue button labeled 'Continue →' is positioned below the input field. At the bottom, there is a small informational note: 'If you don't know how to get item purchase code on envato please click the below button'. Below this note is another blue button labeled 'Find my Code' with a magnifying glass icon.

Step 4: Here provide your current database credentials and wait a few seconds to update your scripts.

The progress bar shows two steps: 'Start' (grey circle with a right arrow) and 'Database' (blue circle with a database icon). The 'Database' step is currently active.
